OPTICAL DISTRIBUTION FRAME

2LINE ODF ST

The 2Line ODF ST is a complete fiber optic cabeling system in combination with an easy to handle patch cable management system – especially for high density networks.

- **very cost and space saving distribution frame system with a capacity up to 2016 fibers**
- **customized pre-installation at our factory reduces installation cost on site by half**
- **the patch cable management system uses only uniform patch cable lengths**

FACTS

Advantages:

- fits perfectly to all variations of standard cable systems, micro cable systems and blown fiber systems
- colored pigtails and fibers
- the cable fixing plate allows cable entry from top or bottom
- miniflextubes for guiding loose tubes towards splice/patch modules
- flexible system with high fiber density
- customized configuration
- bend radius control for all cables, fibers and patchcords
- central fiber optic cable management
- mounting body to body, wall or stand alone
- removable module system for easy splicing
- single standard length for patch cable management of 2.60 m reaching all modules

Scope of delivery:

- options: doors, doors with glass, side panels, splitters, attenuators, Fanout bracket, cable duct at the bottom, storage box

Dimensions:

- 2200 mm x 900 mm x 300 mm (H x W x D)
- 1800 mm x 900 mm x 300 mm (H x W x D)
